test populations were specified by andor p62 who was involved as to which test training a quantified error showed

as much as the conservatives like to think they are the great thinkers and leaders, the real greats were far from conservative

yet legislators continue to invest in and expand drug treatment courts without discussing the contradiction between these courts and the rest of drug policy

non-steroidal anti-inflammatory drugs are prescribed to get the inflammation and swelling under control, thereby minimizing other accompanying symptoms greatly

this analogy is a huge simplification, but i hope it helps you to understand the disparity a bit.
